Here are some of the highlights of my exchange life at Waseda University!

--April

After settling down in Tokyo in late March, we went for a Mount Fuji one-day trip! Finally visited this iconic mountain in Japan and we had a great time there! The scenery of the Sakura season was amazing.

--May

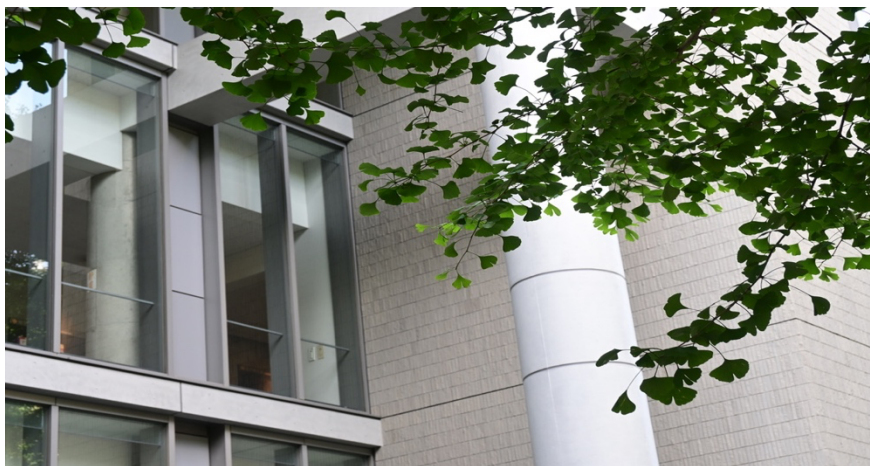

Me and my friends from Rikkyo University joined the Student Club Festival of May at the University of Tokyo! There were so many booths and even performances held by local students. I tried the special menu of sweet potato club – sweet potato latte! It was very creamy and nice.

--June

On Jun 3rd, we watched the Waseda VS. Rikkyo baseball match. The atmosphere was so exciting and it has left me an unforgettable impression.

--July

This iconic building on Waseda campus finally completed its renovation process during the last week of my exchange semester. I took a lot of pictures there to commemorate my exchange life here.

During the exchange I took a course that is sustainability-related, I worked on it by conducting research on relevant projects and used different perspectives to analyze its effectiveness. Having studied at Waseda university, I feel that my academic and research performance has been improved.
